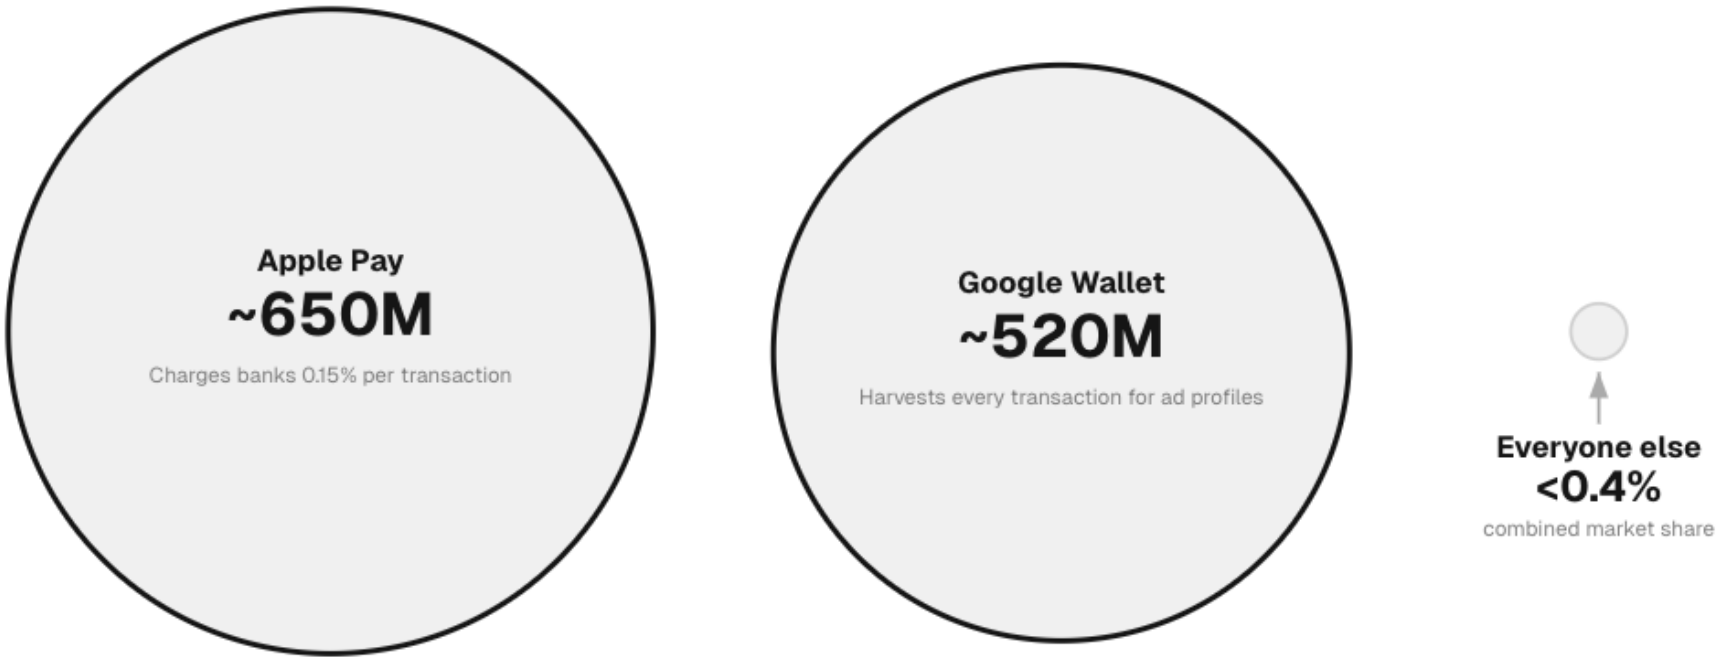
WALT

Private tap-to-pay

Cole Bittel
cole@walt.is

The Problem

Tap-to-pay has no private or European alternative

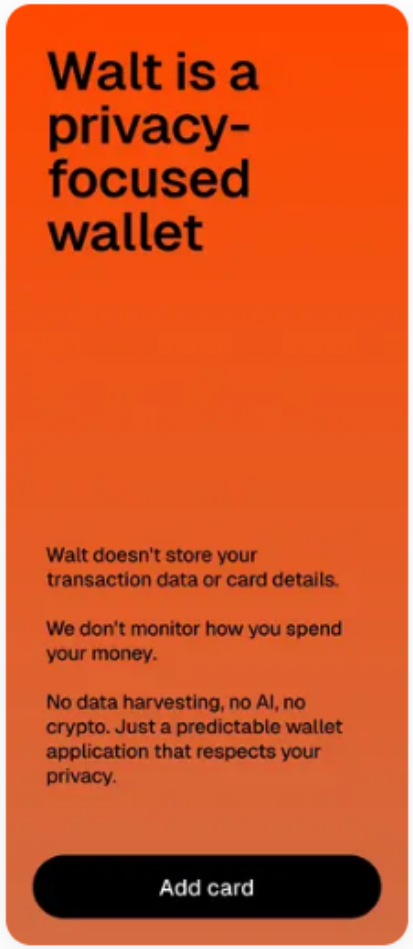


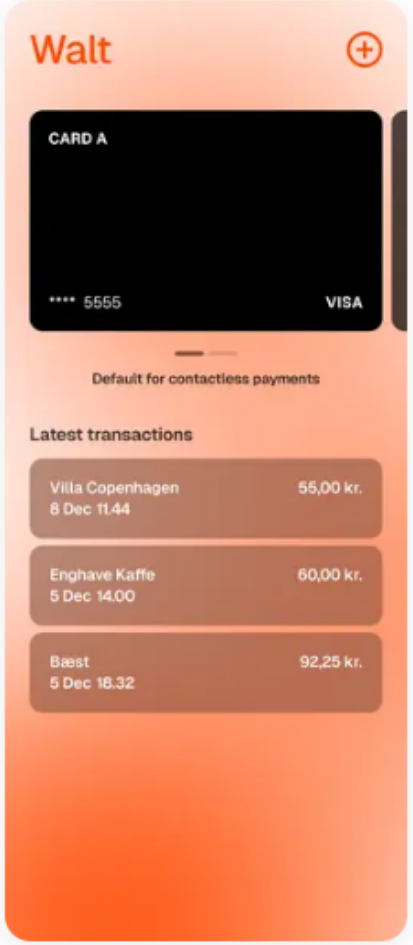
Sources: CoinLaw, WSJ / DOJ, StatCounter

The Solution

Walt is the private alternative to Apple Pay and Google Wallet.

Transaction data encrypted on-device. Never stored on servers.





Why Now?

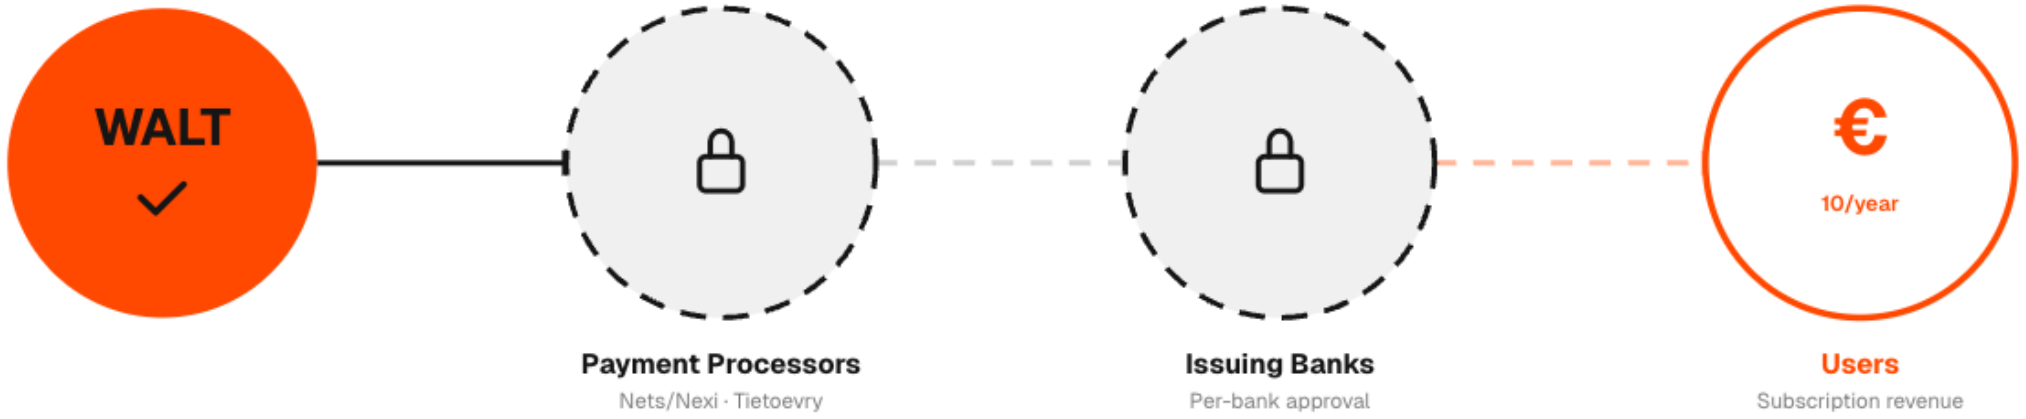
July 2025

EU forced Apple and Google to open NFC access. For the first time, a privacy alternative to tap-to-pay can exist.

Sources: European Commission, US DOJ

Challenges

Two partnerships before revenue



Nets/Nexi alone serves 250+ Nordic banks.

One processor deal unlocks the majority of the market.

The Market

Already established pay-for-privacy market

The Ask

STATUS

Work in Progress

Still formulating the ask.

Immediate Needs

Networking and partnerships with bank representatives to unblock card loading and processing in Europe.

What We're Looking For

- Introductions to European bank partnership teams
- Guidance on EMI licensing and Visa/Mastercard signoff
- Strategic advisors with fintech and payments experience
